Kielikone Case Study

The Product

Kielikone Ltd. is the market leader of digital dictionaries in Finland and one of the world's leading providers of user-friendly language tools. Their flagship product, the MOT language services, is renowned for its high quality and reliability, helping customers navigate and understand language in both everyday life and professional settings.

Kielikone's digital dictionaries are designed to be intuitive and accessible, catering to a wide range of users from students and educators to business professionals and travelers. These dictionaries cover multiple languages and offer comprehensive definitions, translations, and usage examples.

Beyond digital dictionaries, Kielikone offers advanced machine translation services that provide accurate and contextually appropriate translations across various languages. These services are particularly beneficial for businesses operating in multilingual environments, enabling them to communicate effectively with international clients and partners.

The problem

Corporate working environments often require employees to communicate with peers across the globe, resulting in a need for consistent and easily accessible dictionary services. With reliable dictionary services, employees can quickly find translations and definitions, enhancing their productivity and confidence in multilingual interactions.

“Our mission is to help our users to understand, use, and learn languages at work, in school, and in their free time, and one of the cornerstones of our offering are reliable, up-to-date dictionaries. In Oxford Languages we have the perfect partner for this: they bring to the table the world’s best dictionaries combined with a deep understanding of our business.”

Liisa Stén, C.O.O.
Kielikone

The solution

Kielikone developed a dictionary platform that provides language services for users, including definitions and translations. They wanted to create a seamless experience where users can access all their language requirements in one platform with any device.

Kielikone needed trustworthy dictionary data to use in professional and educational settings. Oxford Languages and Kielikone worked together to determine the best solution to fit their dictionary data needs. Utilizing a selection of our monolingual, bilingual, and thesaurus datasets across a wide range of languages, Kielikone developed a bespoke solution that enabled them to provide an efficient and easy to use dictionary service.

Kielikone receive specialized and ongoing support from Oxford Languages to assist with integration of new languages, and maintenance of existing ones. The flexible formatting of our datasets allowed Kielikone to include a vast array of languages in their Sanakirja.fi platform, including our Spanish, German, Russian, Chinese, Italian, French, Hindi, and English monolingual and bilingual lexical data.

With Oxford Languages data, Kielikone are able to provide reliable and diverse language service for their end users, with confidence that our comprehensive coverage and regular updates provide the most up-to-date dictionary content. Our successful partnership provides Kielikone with the efficient and consistent dictionary data needed to power their high-quality services.
